                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Ş
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Ś
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           밁
                                                                                                                                                                                                                                                                                                                                                                                           APPLICANT: Gary L. Breton et al.

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ACINETOBACTER

TITLE OF INVENTION: BAUMANNII FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: GTC99-03PA

CURRENT APPLICATION NUMBER: US/09/328,352

CURRENT FILING DATE: 1999-06-04

NUMBER OF SEQ ID NOS: 8252

SEQ ID NO 3206

LENGTH: 1557
                                                                                                                                                                                                                                     Query Match

GENERAL INFORMATION:

APPLICANT: OLEK, Alexander

APPLICANT: DLEK, Alexander

APPLICANT: DLEK, Alexander

APPLICANT: DEPENBROCK, Christian

APPLICANT: DERLIN, Kurt

ITILE OF INVENTION: Diagnosis of Diseases Associated with DNA Replication

FILE OF INVENTION: by Assessing DNA Methylation

FILE REFERENCE: 5013.1012

CURRENT APPLICATION NUMBER: US/10/204,708

CURRENT APPLICATION NUMBER: DCT/EP01/03971

PRIOR APPLICATION NUMBER: DCT/EP01/03971

PRIOR APPLICATION NUMBER: DE 10019058.8
